

April 30, 2007

To Tom Miano:

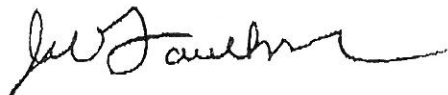

I am not one who is easily impressed but I must tell you of the results I've received from your Ketsumeisei product. My type two diabetes has not been controlled even while taking 5 mg of Chyburide twice daily. My blood sugar routinely ran in the 260 range and sometimes went as high as 300. When I heard of a nutritional product that could control my type two diabetes I did not believe it but, thought I would give it a try because uncontrolled sugar levels can be very dangerous.

After three weeks of my taking the Ketsumeisei, my blood sugar was in the 130 range and if I walk some every day it will go even lower into the 120's. Even when I eat a lot of sugary foods, the highest my blood sugar has gone is in the 170's!

I also have struggled with uncontrollable high blood pressure for decades and was taking 2.5 mg of Vasotec twice daily to help lower my blood pressure. An interesting side effect of taking the Ketsumeisei, my blood pressure is now down from its usual 190/140 with the high number sometimes being over 200, to about 140/80.

This is such a really good product, I would never have believed it was possible of a nutritional supplement. But there is no doubt that the positive effects on my blood sugar and my blood pressure were both a result of my taking Ketsumeisei. Thank you.

Sincerely,

Jerry Faulkner
